A. Context

This area of Chennai, consists of poor families where the children and youngsters are not catered to. They do not have a place to have informal classes and the poor children find it difficult to do their daily studies in their houses due to lack of space or a good atmosphere. Even the youth in the area are disorganized and their potential is not utilized because they do not have a center where they can have motivation sessions, follow-up programme, meetings for self-help groups and an office for their periodic meetings. These children and youth with high hopes and enthusiasm due to negligence, tend to be disinterested in their studies and social activities. The women are the worst affected, most of them have similar stories of domestic violence, abuse and poverty, but they do not even have a forum to share their woes, or help out one another.

B. The partners

a. Local partner

The people of CC Pakkam who will also be the beneficiaries of the project, will be our local partners. We are planning to raise level of the total income.

C. Problem situation

Most of the families in this area are economically from a very poor background. The many children and youth who associate with us and are the recipients of our education scholarships and housing funds in this locality do not have a place where they can assemble. The children do not have proper facilities to do their studies and request constantly for informal classes. As a result they get disinterested in studies and social activities. They while away their time, and get into bad company due to peer-pressure which is in abundance in this area. They do not have the ambience in their houses to do their daily studies due to lack of space, family situation, crowded housing locations and the noise of loud-speakers which is a common phenomenon in this area. They are highly talented and enthusiastic children and youngsters, who lack motivation and are an easy prey to unhealthy habits and anti-social elements. Women do not have the luxury of gathering in a safe-zone for any of their interactions.

“Bosco community Center” is designed in such a way that these people who are underprivileged either because they lack a place to gather, have their daily studies or lack motivation are catered to and their needs are fulfilled and thus making way for them to move ahead in their lives.

D. Objectives

a. Overall objective

Upliftment of the poor and socially neglected people, especially the children, youth and women of CC Pakkam.

b. Project purpose

People realise the importance of education, and therefore children and youth need a place to do their daily studies, at the same time, the children and youth of the area need to get trained in informal classes. They also need special sessions to motivate them to have an aim in life. Above all this center will serve the purpose of disbursing our relief measures which include financial assistance to poor women in need, educational scholarships, house-building project, and to gather women for the self-help group meet. These are carried out in the center premises. In this manner, they are assisted in becoming cultured and educated youngsters.

E. Results

We hope to have the building ready by November 2015. And we will start using the building by January 2016.

F. Financing

Half of the project amount will be raised by the local partner and Roberto Baldassarri Onlus will support us with fifty percent of the project amount.
